INTERNATIONAL MARKETING

Welcome to your
German success

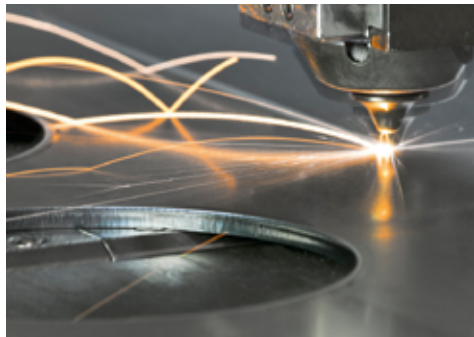

Germany

Being the most densely populated EU member state and the strongest economy in Europe, Germany is a very attractive market. German engineering and production have put the country on the highest levels of innovation and craftsmanship.

In short, it's all happening in Germany.

Who do we think we are?

We are your eyes and ears in the German market. Having over 20 years of international experience in the capital goods, steel construction, building services and components markets makes us invaluable for your organisation and let us function as the bridge into the German culture, regulations as well as the legal and technical requirements.

What we do. For you.

We will link you with the German market. As interface, bringing parties together. Or as a forward scout for your company. Researching, analysing, developing strategies and if required establishing the first contacts.

For us communication is key. Whatever we do, we will communicate any result, any progress directly and immediately.

Our services include support in every possible way:

- Basic market survey or full market research
- Market entry strategy
- Link to the best route to market
- Sales and marketing support
- Implementation of local approvals
- Getting your company registered in Germany

Contact us, talk to us. Allow us to give you our solutions. Your solution for Germany.
